

## Joomla Integration Guidelines

Please create a backup copy of your database and website before you start following these guidelines. We recommend this as a precaution measure.

## Step 1. Install a CDN Extension for Joomla

- You can download the extension using this link (there's no need to unpack it).
- Log in to the administration section of Joomla.
- Click the 'Extensions' tab on the upper navigation panel and then go to the 'Extension Manager' section. You should see the 'Install section' next, if you are not there, try clicking the 'Install' link on the top.
- Find the 'Upload Package File' section, then click the 'Choose File' button and browse your computer for the CDN extension for Joomla that you have already downloaded.
- Click the 'Upload & Install' button to download and install the extension on your website.

## Step 2. Configure the CDN Extension for Joomla

Click the 'Extensions' tab on the upper navigation panel and then go to the 'Plugin Manager' section.

Find the CDN for Joomla! plugin – it will be displayed as 'System — CDN for Joomla!', and then click it to configure it.

Joomlate is free software released under the GNU General Public License.

## www.cdnvideo.com

On the configuration page under the 'Basic options' specify your CDNvideo domain name (you can find it in the email message with all settings that you received from our employee). To save the new configuration, click the 'Save' button.
