

WordPress Integration Guidelines

Step 1.

Log in to your WordPress account via yoursite.com/wp-admin using your credentials.

	WC	RD	PRESS
ou are now logged out.			
Use	rname		
ex	ample		
Pas	sword		
•••		•••	
R	emember Me		Log In

Step 2.

Click on 'Add New' in the 'Plugins' menu.

Step 3.

Find W3 Total Cache using search.

Step 4.

Install W3 Total Cache.

	Search Search Results Upload Featured Pop			
	Keyword V3 Total Cache	× Search Pl		
4 2	Name	Version		
ce	W3 Total Cache Details Install Now	0.9.2.8		

Step 5.

Confirm installation.

Step 6.

Click on 'Activate Plugin'.

Step 7.

Choose the 'Performance' option from the 'Plugins' menu.

Step 8.

Enable CDN checking the 'Enable' checkbox under 'General Settings' in your Dashboard.

CDN	
Host static files with your content delive	ry network provider to reduce page load time.
CDN:	✓ Enable
	Theme files, media library attachments, CSS, JS files etc will appear to load instantly for site visitors.
CDN Type:	Generic Mirror
	Select the CDN type you wish to use.
Save all settings Purge cache	

Step 9.

Click on 'Specify it here'.

A configuration issue prevents CDN from working: The "Replace default hostname with" field cannot be empty. Specify it here.

Jump to: Main Menu | General | Configuration | Advanced | Note(s)

Step 10.

Specify your CDNvideo domain name (you can find it in the email message with all settings that you received from our employee).

Configuration	
SSL support	Auto (determine connection type automatically)
	Some CDN providers may or may not support SSL, contact your vendor for more information.
Replace site's hostname with:	
	1. example.cdnvideo.com
	(Add CNAME)
	Enter the hostname provided by your CDN provider, this value will replace your site's hostname in the HTML.
(Test Mirror)	
Save all settings	

Step 11.

Go back to 'General Settings' and enable CDN by clicking on 'Enable'. Don't forget to click the 'Save All Settings' button to save all changes.
